# OUR CUSTOM PANEL LAYUPS ARE UNPARALELLED

*ASK US ABOUT IT TODAY*

Along with our extensive selection of stock hardwood plywood panels, Rugby can work with you to create specialty panels that meet any project's needs. Whether it is an exotic species of veneer, or a specific cut of veneer, we can work with our partner mills to create what your project needs. Our mills have extensive resources to create beautiful flitch matched panels, on a variety of cores, and in a number of sizes.

We work with large commercial projects, but we can all handle small specialized orders, sometimes as small as one piece! Our custom panel program can fulfill the needs of most any venture, including environmentally sensitive requirements including FSC certification and LEED © certified projects. Rugby has some of the tightest turnaround times in the industry for custom panels. We look forward to working closely with you on your next architectural panel project!

# Nordus

the scandinavian collection

## Contemporary Softwood Panels

For the 'Nordus' collection, only the best softwood and birchwood is collected and carefully processed into finely cut veneer. This way, the raw materials are optimized. Advanced surface treatments reinforce the unique beauty of wood and highlight its 3D aspect. A team of trend watchers suggested various trendy finishing options such as metallic shades, ash grey or neutral white accents allowing 'Nordus' to be integrated in every interior.

- Advanced surface treatments highlight 3D aspect
- Unfinished panels are easily customized to cover broad color palette range
- Scandinavian influence integrated into modern design
- Mixmatch technique to give natural appearance of solid wood
- 19mm x 4' x 9' G2S Panels
- Matching .6mm thick edgebanding
- Matching 4' x 9' flexible veneer

/ OPEN /

Brochure

Edgebanding

Flex Veneer

Sample Binder Available

A Nordus panel is composed of a top layer of real wood veneer, a core of 18 mm MDF and a backing of real wood veneer for stability reasons. The top layer is always a jointed veneer sheet in accordance with the chosen design, composed using our mix match technique.

# KERFKORE®

**Innovative bendable substrate designed to be laminated flat and then cold-formed into virtually any curve.**

Kerfkore is a superior choice for doing fast, accurate and quality radius projects. It provides the ability to create smooth and symmetrical inside and outside radii down to 3 1/2". Virtually any curve desired can be produced with this product.

Kerfkore saves time and improves quality by first laminating flat and machining flat prior to bending. It is dimensionally stable and holds its shape when formed with a series of horizontal ribs. It can also be formed rigid by laminating a back material to the part while held in the desired shape. An excellent method for this type of lamination is the use of a vacuum press.

Kerfkore is a patented process that consists of a kerfed core material joined with a very flexible latex impregnated paper face. This allows for the flat lamination of high pressure laminates, 2-ply veneers, metals and others semi-rigid face products and then formed into the necessary shapes without any telegraphing, stress cracks or delamination. Kerfkore is ideal for production environments where repetitive products are manufactured. The requirement to produce identical parts in size and performance provides the use of labor saving methods to achieve a high quality predictable end results. Its versatility also allows for those very custom one of a kind applications where artistic results are desired.

# Wilsonart®

Wilsonart Engineered Surfaces is a world leading manufacturing and distribution organization that is driven by a mission to create innovative, high performance surfaces people love, with world-class service our customers can count on, delivered by people all over the world who care.

With hundreds of kitchen countertop designs and bathroom vanity surfaces to choose from, including woodgrains, abstracts and solids, you're certain to find the perfect solution for all of your project needs. Wilsonart laminate designs are available with a number of premium finish options, too. From traditional matte and glossy finishes to abstract textures, you can create a custom look for every surface.

Wilsonart's enhanced antimicrobial protection is built into the laminate to protect the surface against damaging microbes. Antimicrobial agents protect the surface against growth of mold and mildew that cause stains and odors when used for countertops and work surfaces.

## SOLICOR™

Wilsonart® SOLICOR™ is a specialty laminate created with a solid color core that lets you design visually crisp and stunning spaces by eliminating the disruptive brown line at the edges.

/ OPEN /

Brochure

## Chemsurf®

Specifically designed for environments where chemicals and harsh cleaners are used, Wilsonart® Chemsurf® provides exceptional chemical resistance without sacrificing design or style. Available in Matte finish.

## Decorative Metals

Wilsonart® Decorative Metals collection is the high-tech hybrid of industrial flair and sophisticated design. Whether used for vertical applications or as an accent to countertops, the Decorative Metals line is surprisingly adaptable and a virtually unbreakable addition to any commercial project.

# Wilsonart®

## ADHESIVES

Wilsonart® Adhesives are specifically formulated to offer unparalleled bonding performance for High Pressure Decorative Laminate and other surfacing products. The Wilsonart Adhesive product line includes solvent-based and water-based contact adhesives, PVA-type white glues, wood glues, solvents, cleaners and custom colored matched caulk for Wilsonart® Laminate, Wilsonart® Solid Surface and Wilsonart® Quartz designs.

## CONTACT

Wilsonart® Adhesives have held together many of America's foremost projects since 1970. Wilsonart® Contact Adhesives are specifically formulated for use with High Pressure Laminate. With outstanding bond strength and high heat resistance, our contact adhesives are the perfect choice for your countertop, fixture or panel.

## PVA

From fast-setting adhesives to high performing wood glues, Wilsonart's lineup of poly-vinyl acetate (PVA) adhesives and specialty products are sure to meet the needs of any laminating or woodworking operation.

# DOELLKEN

## PVC EDGEBANDING

Doellken PVC Edgebanding is the finest, most consistent product available on the market today. Typical applications of PVC Edgebanding include residential and office furniture, institutional caseworks (laboratories, hospitals, medical offices, schools, etc.), store fixtures, kitchens, locker rooms and numerous others. Doellken Edgebanding comes in thicknesses of .018" (0.45 mm) to 3 mm and widths ranging from 5/8" (16mm) to 2-3/16" (55mm).

/ OPEN /

Brochure

- The SpecLine and DoellkenFlex program are available from stock in 5 different sizes
- All edgebanding products are available in solid colors, designer patterns and woodgrains
- With 11 different embosses, your edgebands will have a natural appearance and a deep emboss feel

## HIGH QUALITY ADHESIVE

Doellken exclusively represents the Dorus-Technomelt line of high-quality, superior performance Edgebanding hot melt Adhesive. Dorus-Technomelt products provide total solutions, including innovative technology permanently adjusted to the latest woodworking requirements.

From Edgebanding to profile wrapping and dowel insertion, Dorus-Technomelt provides cost efficient and reliable Adhesive solutions for all woodworking applications.

Blum is an international company that produces hinge-, lift- and runner-systems and the appropriate assembly tools for the cabinet making and furniture industry with exports to over 120 countries.

Blum, Inc. does a great deal of testing to ensure that the quality of their hardware is consistent with the high standards that customers have come to expect from Blum. Their hinge systems meet or exceed ANSI/BHMA grade 2 requirements. Blum drawer systems meet or exceed ANSI/BHMA grade 1 requirements. Their Quality Management System is also ISO 9001 certified.

**AVENTOS LIFT SYSTEM**

Opening and closing upper cabinet doors has never been so easy. With *AVENTOS* doors fold up and out of the way. They can be stopped in any location, meaning the handle always stays within reach.

- *AVENTOS HF*: bi-fold doors lift up and out of the way
- *AVENTOS HS*: lifts doors up and over the cabinet
- *AVENTOS HL*: doors lift parallel to the cabinet
- *AVENTOS HK*: stay lifts swing up and out of the way

**CONCEALED HINGES**

Compact Bluemotion hinges were specifically designed for face frame cabinets. The soft close feature is built right into the hinge cup, and it can even be deactivated for small or light doors. With Compact Bluemotion, doors close silently every time.

**BOX SYSTEMS**

*LEGRABOX* is extraordinary in both design and performance  
*TANDEMBOX* offers endless possibilities for metal drawers  
*METABOX* is our versatile, economical steel drawer system

**TANDEM plus BLUMOTION:**  
The next generation of runner systems

Our Tandem plus Blumotion runners are the latest advancement in concealed runner technology. They offer four-dimensional adjustment, excellent stability and minimal sag; all while maintaining smooth running action and unmatched soft close.

Tandem plus Blumotion concealed runners are also made in the USA at our North Carolina facility. This is just another example of Blum's commitment to manufacturing products in the U.S., for the U.S. market.

- Drawer lengths from 9" - 30" in 3" increments
- Runners for 1/2" to 3/4" drawer material thickness
- Full extension runners
- Integrated BLUMOTION soft close
- Exceeds ANSI/BHMA A156.9 2010 grade 1 specifications
- Bottom holes for mounting to a fixed shelf or flush bottom cabinet
- Available for standard or heavy-duty applications
- Excellent stability and less sag even with a fully loaded drawer
- Same drawer box construction as the current Tandem runners

**Interactive Tools**

Blum provides downloadable Excel® spreadsheets that help you order the correct parts and calculate mounting locations. Two versions are available for each planning tool, one that is compatible with Excel 2003 - 2015 and one that is compatible for Excel 2016.

# Roseburg

A Forest Products Company

Roseburg offers the most technically diverse line of medium density fiberboard (MDF) products in North America. From moisture resistant to flame retardant to no-added formaldehyde (NAF), Roseburg has an MDF panel to suit your every need.

## Medex® MDF

Medex® is a sustainable, moisture resistant, medium density fiberboard (MDF) panel utilizing a synthetic resin system and pre-consumer recycled wood fiber. Medex® is engineered for interior high moisture areas in non-structural applications and is used in place of sanded plywood or solid wood. With the versatility of a superior composite wood panel and the enhancement of indoor air quality, Medex® has been specified in hundreds of commercial, institutional and conservator projects since the 1980s. Manufactured in Medford, OR.

/ OPEN /

Brochure

## Medite® MDF

Medite® is the foundation of the Roseburg MDF product line and offers a smooth hard surface, exceptional machining, plus clean, sharp edges for cutting and drilling applications. Medite® is a competitive workhorse representing uniformity in MDF and highly suitable for precision part manufacturing.

/ OPEN /

Brochure

TimberStrand® laminated strand lumber (LSL) is made from aspen trees and is one of the strongest, straightest, most stable wood products available for industrial applications.

Any way you cut it, every piece of TimberStrand® LSL provides the same consistent performance, without knots, wane or grain defects, making it an excellent alternative to solid lumber and other composite wood products.

Available in thicknesses ranging from 1 to 3 1/2 inches, TimberStrand® LSL can be machined just like solid wood, only making your product stronger, straighter and more efficient — every time.

/ OPEN /

Brochure

# StyleLite®

West Fraser medium density fibreboard (MDF) panels are composed of 100% western white softwoods that have a consistent light sandy color. The purity and long fibres associated with this material allow for deep, detailed profiling and smooth machining for easier and better finishing. An added benefit of our panels is the light color of our MDF reduces color show-through when painting. The result is significantly longer tool life.

Ranger Board is western softwood-based MDF that is well known for its machining and painting capabilities. Ranger has a multi-opening press of 6' x 24', which enables the production of a wide range of thicknesses and densities from 3/8" through to 1 1/2".

- Used for furniture, cabinetry, flooring, and millwork. MDF is manufactured from ligno-cellulosic fibres (wood and plant dry matter) bonded together with a formaldehyde containing binder
- Standard finish on all panels is 150 grit
- Eco® certified
- Moisture content: Average moisture content of finished panels as shipped is 4 – 6%
- Finished sizes available: Width 48" to 73", Length 48" to 205"
- FSC® options available

## The Ultimate High Gloss and Matte Panel System

- Manufactured using state-of-the-art equipment and the finest materials, StyleLite possesses an optical grade surface of the highest quality compared to all other traditional categories of high gloss panels
- StyleLite's deep, mirror-like gloss surface contains none of the obvious orange peeling, imperfections or telegraphing inherent in inferior high gloss panel types such as melamines, laminates, thermofoils (vinyl wraps) and most painted panels
- StyleLite is generally repairable if lightly or moderately scratched saving time, money and inconvenience
- StyleLite also offers StyleLite Sheet which is manufactured from high quality acrylic-capped ABS, and features reverse-side for superior bonding. StyleLite Sheet is sold for laminator's use only – it is provided ready for manual or machine lamination onto a variety of substrates
