9 of the 80 Available Designs

arauco PRISM

TFL | Thermally Fused Laminate

PRISM is a colorful thermally fused laminate brand that has real character with a designer-friendly focus.

Our Exclusive Collection, targeting commercial and residential applications, consists of over 80 designs (Woodgrains, Abstracts and Specialty Solids) available only from PRISM.

2 New Textures – Boreal and Velvet

Boreal is a tactile, striated texture that invites adventure and limitless design possibilities. Velvet offers a warm touch to surfaces. The smooth, matte texture amps up sophistication in woodgrain and solid designs.

Industry-first InCopper™ Antimicrobial Technology

This proprietary technology available in all Prism TFL exclusive designs (as specified per order)*, protects the surface of the panel, actively inhibiting the growth of microorganisms that cause deterioration, stains or degradation.

Symmetry Program

Prism TFL is all matched up! Our Symmetry Program features a wide array of complementary products including edgebanding, high pressure laminate, door and drawer components.

Brochure

DECOSPAN®

Wood Solutions

With a production capacity of 8,000 boards a day. Decospan is Europe's market leader in veneered materials. Their unique high pressure, low temperature pressing procedure guarantees the highest quality results in three available grades:

ARCHITECTURAL – Cut from uniform, unblemished logs with an attractive design and pattern structure processed for their visual quantity. Panels are sequenced and numbered to ensure maximum grain continuity when installed successively.

CLASSIC – Appropriate for most circumstances, this variant allows a number of characteristics that are specific to the wood but are in no way disruptive to the appearance. Numbered sequences will be shorter than those found in Architectural.

COMMERCIAL – Economically priced, these panels have a less regular structure with color nuances, smaller series, and more knots.

PlyClear

PlyClear® is Mt.Baker Products' exclusive formaldehyde-free resin.

Mt.Baker's Soy Based Adhesive eliminates added urea formaldehyde from veneer core and NAF composite hardwood plywood panels. From manufacturing to the consumer, all will have peace of mind knowing that Mt.Baker Products' PlyClear panels are the healthy and environmentally sound choice.

- Mt.Baker Products PlyClear® panels are available exclusively through Rugby Architectural Building Products in Phoenix, Arizona
- Mt.Baker Veneer and MDX Cores
 - Veneer 5/32"–1-1/2"
 - MDX 3/8" – 1-1/2"
- NAF PBC and MDF Cores
 - PBC 1/2" – 1-1/2"
 - MDF 5/32" – 1-1/4"
- Panel Dimensions
 - 4' x 6', 4' x 7', 4' x 8', 4' x 10' (1/2" Oversize)

EnStron™
by Plummer Forest Products

Environmentally Strong

FSC® Certified	Formaldehyde Free
CARB Exempt	Moisture Resistant
ECC Eco Certified Composite	Fire Resistant – Class 1 (A)

EnStron Industrial is made from 100% pre-consumer recycled wood fiber, and no added formaldehyde. Manufactured in Post Falls Idaho, the board is produced from western softwood fiber, and environmentally sound pMDI resin. It combines the machinability and workability of pine and other whitewood species with the most environmentally sound resin technology in the composite panel industry.

Our particleboard provides a high quality standard and demonstrates our commitment to sustainability and indoor air quality. EnStron industrial particleboard is the ideal choice for office and residential furniture, kitchen and bathroom cabinets, shelving, and door core.

Plummer Forest Products was born from a rich heritage and love for the forest products industry. The “can do” attitude of more than 70 people working as a tight knit team, make Plummer Forest Products a flexible and unique company, always striving to improve, one breakthrough at a time.

UV Finished Hardwood Plywood Panels

- Panels are finished on our state of the art UV line, utilizing our TuffCoat UV (patent pending) finishing system
- Our UV line can accommodate panels up to 5' wide and 10' long and 1-1/2" thick
- Our UV finish is durable, cost effective and environmentally friendly, with virtually no emissions
- Birch, Maple, Oak, Alder, Cherry, Beech & many other species in stock
- Wide variety of grades and cores available.
- We offer clear finish in different gloss levels, custom tinted finish, and graphic friendly finish.
- Available substrates include FSC®, NAUF, NAF & CARB II
- The panels are used for Kitchen & Bathroom cabinets, Drawer components, shelving, doorskins, store fixtures, displays and many other applications
- Cut to size and edge finishing available
- Custom drawer size programs available

We manufacture plywood products to various grades, dimensions and performance standards appropriate for a wide range of customer end-uses. We use mainly inland Douglas fir and Western larch due to their ability to produce fine grain and smooth faces. Controlling quantity from raw materials to finished products allows us to build custom plywood that meets precise customer expectations. From Marine Grade to our proprietary HDF Ultra-Core™ laminating panels, we engineer our softwood plywood for maximum value.

MARINEDECK – Designed for rigorous marine use with plugged “CP” faces

MARINETECH – High integrity, composed cross-bands with minimal core gaps and superior “B” & better faces

ULTRA-CORE HDF – Features High Density Fiberboard surfaces fused to a solid core of Industrial Grade Softwood Plywood.

When it comes to value, what really counts is not how much the MDF costs, but how much it costs to use.

**WEYERHAEUSER GLACIER GREEN™
HIGH DENSITY MACHINING GRADE IS IDEAL**

- Thermo-Foil Lamination
- Heat/UV-Cured Dry Coatings
- Water & Solvent-Based Paints
- Thickness 0.375” – 1.00”

Brochure

PotlatchDeltic Precision Core™ Plywood

Our Precision Core panels are manufactured with one-piece composed veneer, virtually eliminating core voids and gaps and removing the large open defects often hidden in the cores of other panels. Core composers, wood boat patchers, automatic layup lines, and six-head sanders give us the flexibility to produce panels that meet the exact specifications for such end uses as:

- Material handling
- Recreational vehicles
- Laminating
- Agriculture bins
- Truck bodies
- Marine industry
- Concrete forming
- Furniture framing

Brochure

GoldenEdge Superlite is 33% lighter than regular MDF but maintains the excellent strength quality, surface smoothness and stability. The surface can be painted to achieve a high quality finish and provides a uniform substrate for overlaying. GoldenEdge Superlite has a light color and is most suitable for any light, white or pale color papers or foil for laminating. The color is consistent. The reduction in density of GoldenEdge Superlite ensures that machine tools will last many times longer and so reduces down time. It's lighter weight makes it easier to work, with consequent increased efficiency.

**Extended tool life
Reduced down time
Enhanced workability**

Laminate Technologies Inc. is a leader in manufacturing Laminated Panels, Component Cabinet Parts, Specialty Hardwood Veneer Panels, and Cabinet Door and Specialty Products. We offer a diverse mix of foils, vinyls, domestic and import hardwood veneers, thermofoil products, acrylics, and value added services so you get exactly what you want, when you want it. Our offering includes but is not limited to these products.

Bring your vision to us and let us bring it to life

Panel Processing has been adding value for over 45 years. As a custom flat panel fabricator it is our job to take your vision and bring it to life. As a 100% employee owned company with over 11 manufacturing facilities, unprecedented experience in fabricating, painting and laminating, we are the leader in custom flat panel fabrication. We may have started with pegboard but we are much more. We can punch, cut, paint, design, coat, laminate, machine a multitude of wood substrates to create various products such as our slatwall, laminated panels, casework, cabinet components that can be found in store fixtures, kitchens, closets, schools, and RTA furniture to name a few.

An industry-recognized leader in UV finishing, painting, and staining.

Decoboard's capability springs from modern high-speed machines that use the latest in coating technology. UV (Ultra-Violet) cured finishes are widely regarded as the hardest-working coatings available, and Decoboard makes it easy for you to take advantage of this incredible technology. Our vast capability and automation allows us to complete up to 3,000 4x8 faces in one shift, creating cost savings that would not be possible by any other method.

UV coatings provide environmental benefits as well. Our UV coatings are virtually 100% solids; the coating stays on the panel, and does not enter the atmosphere. There are no solvents carrying harmful VOC's (volatile organic compounds), and no added formaldehyde. Most traditional finishes have less than 30% solids, meaning 70% or more of the product will evaporate. In addition, UV coatings applied by roll coater have 100% transfer efficiency; unused coating returns to the container to be cycled through the system again.

Decoboard's finishing process easily passes the requirements for LEED; contact us for more details.

- Cost-efficient (100% solid - 99.9% transfer) instant cure-photochemical reaction that produces a consistent, hard finish without VOCs or Added Formaldehyde
- Stain, fill, seal, UV tint, and topcoat substrates from 5 to 80 sheen
- Proprietary flexible coating solutions for loose veneers

RUGBY CUSTOM PANEL DIVISION

High Pressure Laminate Panels
Custom Made to Your Specifications

RUGBY HPL PANELS

- In-house high-pressure lamination line
- Most all brands of HPL and Metals
- Large variety of substrates and specialty core materials
- Press capability up to 5'x12'
- Thicknesses from 1/4" to 3"
- Quick lead times. No minimums
- All panels are cleaned and trim routed
- Environmentally friendly water-based PVA adhesives
- FSC® certified panels are available
- Special thicknesses can be manufactured to your specifications
- Experienced and knowledgeable industry leading personnel

**CHOOSE RUGBY TO SAVE YOU
TIME AND MONEY ON YOUR
CUSTOM HPL PANELS!**

CUSTOM PLYWOOD PANELS

- Plywood panels custom made to your specifications
- Domestic and exotic wood veneer species available
- Large variety of substrate core materials
- Available in many thicknesses and sizes
- Custom configurations, cuts, machining and finishing options
- Quality domestic manufacturing
- Excellent lead times. No minimums.

Premium Hardwood Sheet Veneer & Edgebanding

Veneer Technologies, Inc. manufactures high end decorative hardwood veneer faces. They carry most domestic species and have access to many exotic species from around the world. They currently operate ten continuous cross feed splicers, producing approximately 6.5 million finished square feet of face veneer per month.

SHEET VENEER

Manufactured with a select grade face veneer crosslinked to a variety of backers. Backers include 10 mil, 20 mil, 2-ply with cross-grain back, 3M peel-n-stick, polyback, true phenolic. Sizes are 4' x 8', 4' x 10', 4' x 12'. Custom sizes available.

WOOD EDGEBANDING

- Standard wood edgebanding
- 500' rolls, fleeced and sanded
- 250' rolls, preglued EVA hotmelt
- 3M peel-n-stick
- UV prefinished, preglued or fleece backed
- Widths 1/2" to 2"
- Custom widths and lengths available

THICK WOOD EDGE ROLLS

- 328' rolls. Thickness 1mm, 1.5mm, 2mm, and 3mm

Please inquire about available widths and species

Most Domestic and Many Exotic Species Available

Wilsonart Engineered Surfaces offers hundreds of kitchen countertop designs and bathroom vanity surfaces to choose from, including woodgrains, abstracts and solids. Wilsonart laminate designs are available with a number of premium finish options: traditional matte, glossy finishes, and abstract textures.

Wilsonart's enhanced antimicrobial protection is built into the laminate to protect the surface against damaging microbes. Antimicrobial agents protect the surface against growth of mold and mildew that cause stains and odors when used for countertops and work surfaces.

SOLICOR™

Wilsonart® SOLICOR™ is a specialty laminate created with a solid color core that lets you design visually crisp and stunning spaces by eliminating the disruptive brown line at the edges.

Chemsurf®

Specifically designed for environments where chemicals and harsh cleaners are used, Wilsonart® Chemsurf® provides exceptional chemical resistance without sacrificing design or style. Available in Matte finish.

/ OPEN /

Brochure

Decorative Metals

Wilsonart® Decorative Metals collection is the high-tech hybrid of industrial flair and sophisticated design. Whether used for vertical applications or as an accent to countertops, the Decorative Metals line is surprisingly adaptable and a virtually unbreakable addition to any commercial project.

Adhesives

The Wilsonart Adhesive product line includes solvent-based and water-based contact adhesives, PVA-type white glues, wood glues, solvents, cleaners and custom colored matched caulk for Wilsonart® Laminate, Wilsonart® Solid Surface and Wilsonart® Quartz designs.

CONTACT

Wilsonart® Contact Adhesives are specifically formulated for use with High Pressure Laminate. With outstanding bond strength and high heat resistance. These contact adhesives are the perfect choice for your countertop, fixture or panel.

PVA

Wilsonart's lineup of poly-vinyl acetate (PVA) adhesives and specialty products are sure to meet the needs of any laminating or woodworking operation.

SOLVENTS AND CLEANERS

Whether you choose a solvent to clean your equipment or one of our cleaners to remove adhesive residue from the decorative surface, Wilsonart® Solvents and Cleaners will do the job right.

SPECIALTY

Wilsonart® Color-Matched Caulk is a high-quality sealant formulated to color match Wilsonart® Laminate, Solid Surface, Quartz and other hard surfaces.

Sinks and Bowls

An integral sink will improve the efficiency and hygienic qualities of a kitchen or bath area and, particularly, interior commercial applications. Staron all-acrylic sinks and bowls are installed in combination with Staron sheet materials as part of a continuous surface featuring imperceptible seams for a perfect, uninterrupted fit. That also means there are no gaps or crevices for bacteria or mold to accumulate and grow. Whichever style you choose, Staron's non-porous, hygienic surfaces will always be easy to clean and maintain.

Choose from three coordinated sink color options from a collection of popular models.

Lustrolite®

Combining its beautiful ripple free, highly scratch resistant surface with magnificent panel depth and light weight, Lustrolite® is a vastly superior alternative to tiles, glass and other materials.

Lustrolite's impressive list of features includes:

- Brilliant mirror reflection and high gloss finish
- Significantly less expensive than equivalent glass products
- Effortless to clean due to its advanced scratch and chemical resistant hard coating
- Can be cut, drilled, filed and planed with standard woodworking tools (e.g. circular saws, jigsaws, files and planers)
- Half the weight of equivalent glass panels yet up to 25 times stronger making handling, installation and longevity vastly superior
- Fantastic for hygiene as Lustrolite's smooth surface does not harbor mold or bacteria
