

inspiration everywhere

We find inspiration everywhere

Creativity doesn't just happen. It must be cultivated. We found inspiration for our TFL panels all over the world, from cabinetry in Copenhagen to hotel lobbies in Lisbon, exotic hardwoods in the jungles of Indonesia, and old-growth barn wood in the heart of Indiana. Go ahead. Go wild with the best selection of TFL designs and options available.

As a member of the Wilsonart family, we create high-quality, globally inspired TFL with an emphasis on speed, service, value, and most of all flexibility. Get inspired by more. More TFL textures. More colors. And more eco-friendly options. For timeless tastes and tomorrow's TFL trends, think KML.

High-touch spaces. High-traffic solutions.

Design connects and comforts us like never before. Hotel lobbies look like living rooms, office break rooms like restaurants, and common areas in apartments are about more than just big screens. We've created signature TFL looks to bring a touch of natural warmth to these high-traffic spaces without sacrificing durability.

edgewood

Go wild with the look and
feel of **exotic wood grain**
featuring a deep reveal.

Core

All the options you want

Designers told us they wanted more TFL options. We answered with more than 800 colors, 8 textures, and the best core selection available.

All the specification help you need

Need help with your specification? Just give us a call. Our experts will guide you to the right texture, color, and core for your project.

All of TFL's unbeatable value

A fraction of the cost of wood veneer, more consistent and more durable, TFL is taking off for a reason. TFL will work in virtually any vertical application — and even in some horizontal applications — when specified with the right core.

Top-tier cores for unmatched performance

We offer flexibility with your core options and expert help with specification, ensuring the lasting beauty and function of your project. Get particle board and MDF made from pre-consumer 100% recycled Western Pine. A high-quality industrial byproduct, it delivers strong lamination and fast, clean cutting while saving trees. We also offer moisture and fire-resistant cores, low-emitting or no-formaldehyde cores, and panels in more sizes and thicknesses than most.

Eco-friendly to the core

FSC® certified and committed to delivering a full-range of eco-friendly core options, we believe responsible forestry creates better products, a better world, and a more sustainable industry. Contact us to learn about our LEED-point opportunities.

Abstract

Solids

Go ahead. Expand your pallet.

The look of any TFL panel comes mostly from the décor paper thermally fused to the panel's core. With over 800 décor paper options — often simply called colors — we offer more flexibility where it really counts to achieve the style you want. Our spec reps will guide you to the color that perfectly pairs with the finish and application you have in mind. Then, we'll help you bring it all together with everything else you need to create a coordinated look.

A difference you can feel — eight times over

Add texture and dimension to TFL with one of our many designer finishes. Want cabinets with a striking wood grain, closet components with a textural touch of linen, or an accent wall with the look and feel of reclaimed wood? Our finishes will add authenticity and interest to all your vertical surfaces.

stabilight

High strength. Lightweight.

With the strength of a solid board at a fraction of the weight, StabiLight delivers strong lamination and clean cutting for multiple applications. Created from high-quality industrial byproducts, this eco-friendly board is also light on the environment. StabiLight is available in full panels or custom. Edge banded and machined pieces specific to your project are ready to install. Choose from thousands of TFL or HPL design and color options with the support of an expert specification team.

Specification support

Need expert guidance on your specification? If your KML distributor doesn't offer specification support, our in-house experts are ready to help.

Complimentary samples

Get your hands on the real deal. Our customer care team can create custom samples for you (sample chips or 10"x10" samples available). If you're in a pinch, ship samples quickly so you can make critical design decisions faster.

Faster lead times

US-based with two strategically positioned plants in Tacoma, WA and Stockton, CA, we're the largest TFL provider west of the Mississippi. We can expedite samples, if necessary, so you can make critical design decisions faster.

"One's destination
is never a place,
but always a new way
of seeing things."

– Henry Miller
